

*Aleg*grace®

Luxury Effect Pigments for Cosmetics

Carl Schlenk Aktiengesellschaft is an internationally successful family-owned company based in Roth near Nuremberg in Germany.

SCHLENK is a leading international manufacturer of metal powders, metal pigments and metal foils. Today, it is active worldwide in the fields of cosmetics, metal foils, coatings & plastics industry, printing & graphics industry, building materials & chemical industry and materials. With production sites in Europe, the USA and China as well as application technology centers in Germany, the USA, China and Southeast Asia, SCHLENK has a global sales and service network.

**Alegrace® is the SCHLENK brand for cosmetic pigments. Alegrace® offers cosmetic manufacturers a wide range of different effects for various cosmetic products, especially in the field of decorative color cosmetics. Alegrace® pigments naturally meet all regulatory requirements, and captivate with outstanding purity. SCHLENK also offers support in the form of color and trend development.**

*Discover our collection of unique luxury effect pigments for appealing cosmetic formulations!*

## AUROUS

Gold metallic effects give cosmetic products a luxurious dimension. The Alegrace® Aurous series offers a broad range of natural gold shades, from 24 Carat Gold, White Gold to Copper and Red Gold shades. These new effect pigments allow very vivid and intensely covering gold tones, but they can also be combined with transparent color pigments or other effect pigments to create an infinite number of colored metallic designs.

Alegrace® Aurous lends a certain extravagant metallic shine to various formulations of decorative color cosmetics as well as skin and hair care products. The intensive coverage and colour strength of the Aurous range are unrivaled.

## SPECTACULAR

The Alegrace® Spectacular series provides multi-color sparkling effects to cosmetic formulations. Various levels of intensity of holographic effects can be achieved through different particle sizes. These add eye-catching highlights to every cosmetic product. Spectacular can be combined with different color and effect pigments in order to create stunning polychromatic reflections.

Alegrace® Spectacular offers signature sparkling to decorative cosmetics as well as skin and hair care products already at low pigmentation levels.

## LUSTROUS

Glamorous sparks all over. Alegrace® Lustrous is a range of very visible intensive silver flitters. The bigger particle sizes are adding captivating bling-bling to nail polish, while the smaller particles are turning anhydrous decorative cosmetic products into real eye-catchers.

Alegrace® Lustrous offers fine to very coarse silver aluminium glitter effects, the sparkling effect can even be intensified by combination with Alegrace® Spectacular or different color pigments.

## MARVELOUS

Alegrace® Marvelous is a range of eye-catching vacuum-metallized pigment (VMP) suspensions for solvent- and waterbased nail polish. Alegrace® Marvelous offers outstanding mirror-like effects, in shades from bright silver to platinum. Combined with colorants, stunning colourful metallic effects can be achieved. Alegrace® Marvelous stands out with excellent coverage properties.

## GORGEOUS

Alegrace® Gorgeous is a range of metallic effect pigments for solvent-based and UV curing nail polish. Different grades enable smooth or sparkling silver metallic effects. Additional attractiveness can be achieved by combination with colorants.

## Alegrace® Aurous

Ultra-Thin Pigments

### BENEFITS

- natural gold shades
- outstanding coverage
- highest metallic brilliance
- pleasant skin feel
